

Kitchen. Design & Technology Kristall induction cooktop

MADE IN GERMANY

Product information

Thanks to the particularly flat air outlet, our downdraft ventilation offers you the option of continuing to use the storage space under the stovetop as a drawer. This means you gain more storage space in your kitchen without having to lose space on the cooktop.

Integrated fume cupboard as plug-in solution

Thanks to its compact design, installing the cooktop is child's play. This means less planning effort is required.

Every cookplate with booster

The boost function increases the power of the selected cooktop The flat concept gives you more storage space with, for examfor a short time and allows you to reach the maximum temperature faster.

Bridge function and temperature zones

With the help of the bridge function, 2 fields can be coupled. This means that even larger roasters can be easily accommodated. Defined temperature levels allow you to grill vegetables, meat and fish at the optimum temperature.

Low installation height

ple, an additional drawer under the cooktop.
